PROFESSIONAL SUMMARY

Results-driven B.Tech Computer Science (Data Science) graduate with hands-on experience in Python-based web development using Django, REST API design, and data analysis with NumPy & Pandas. Proficient in OOP principles, PostgreSQL/MySQL database integration, and Git-based version control. Seeking an entry-level Python Developer role to build scalable backend systems in a high-growth engineering environment.

CORE SKILLS

Languages & Frameworks: Python, Django, REST APIs, JavaScript, HTML, CSS, C, C++

Databases & Tools: PostgreSQL, MySQL, SQLite, Git & GitHub, Docker (basic), AWS (basic), MS Excel

Data & Concepts: NumPy, Pandas, Data Cleaning, Data Visualization, OOP, Data Structures & Algorithms

WORK EXPERIENCE

Python & Data Science Intern | Cisco Virtual Internship | 2024

- Automated data processing workflows using Python scripts, reducing manual effort by ~40% and improving reporting pipeline accuracy.
- Analyzed network datasets with Pandas & NumPy, delivering insights that informed infrastructure decisions across the team.
- Developed REST API integration prototypes in Python, improving inter-service communication efficiency by an estimated 25%.

Salesforce Developer Intern | Salesforce Virtual Internship | 2024

- Deployed Python-based automation scripts for Salesforce CRM workflows, cutting repetitive data-entry tasks by ~35%.
- Executed SQL-based data migration with validation checks, ensuring 98% data integrity post-migration.

Data Science & Business Analytics Intern | GRIP Program | 2023

- Built Python predictive models (Pandas, NumPy) achieving ~85% accuracy in sales forecasting on sample datasets.
- Automated cleaning & transformation pipelines for 10,000+ records, reducing preprocessing time by 50%.

PROJECTS

Clash-Free Timetable Generation System | Python | Django | PostgreSQL | Git | 2024

- Developed a full-stack Django web app that auto-generates conflict-free timetables for 50+ faculty across 200+ time-slot combinations.
- Implemented backend validation logic in Python (OOP) to eliminate scheduling overlaps, reducing errors by ~90% vs. manual methods.
- Integrated PostgreSQL database for faculty/subject/slot data management, improving query response time by ~30%.

Anuttram 3.0 Technical Project | Python | HTML | CSS | JavaScript | Git | 2023

- Contributed Python-based feature implementations in a 5-member team, delivering all milestones on schedule under Anuttram 3.0.
- Managed version control via Git/GitHub, maintaining 100% branch merge integrity and zero code conflicts throughout the project.

EDUCATION

B.Tech – Computer Science (Data Science) | Government Engineering College, Sheohar | Bihar Engineering University |

2022 – 2026 | *Graduated*

CGPA: 8.16 / 10.0

Senior Secondary (12th – PCM) | S.L.K. College, Sitamarhi (BSEB) | 2020 – 2022

Percentage: 60.2%

Secondary (10th) | S.R.S. Vidyalaya, Radhaur (BSEB) | 2019 – 2020

Percentage: 82.2%

CERTIFICATIONS

- Python, C & C++ – Spoken Tutorial, IIT Bombay
- C Programming & Embedded System Design (ESD) – NPTEL
