Professional Summary

B.Tech Computer Science (Data Science) graduate with hands-on experience in IT support, incident management, and technical troubleshooting through internships and production project deployments. Proficient in Python, SQL, Django, PostgreSQL, Docker, and AWS. Proven ability to automate workflows, reduce operational overhead, and deliver reliable systems. Seeking to apply engineering and problem-solving skills at Google.

Technical Skills

Languages & Frameworks: Python, SQL, C, C++, HTML/CSS, JavaScript, Django, Shell Scripting

Databases: PostgreSQL, MySQL

DevOps & Cloud: Git, GitHub, Docker, AWS, CI/CD basics

IT & Support Tools: Windows OS, Microsoft Teams, Microsoft Outlook, VPN, Citrix, VDI, Remote Desktop

Processes: Incident Management, SLA Compliance, Root Cause Analysis, SOP Documentation, Escalation Handling, Ticket Management

Experience

Technical Support & Data Science Intern

Nov 2025 – Dec 2025

The Sparks Foundation (GRIP Program)

Remote

- Resolved 20+ technical support tickets with systematic root cause analysis, reducing average resolution time by documenting structured knowledge-base articles for recurring issues.
- Developed Python automation scripts that eliminated repetitive manual workflows, improving team operational efficiency by ~30%.
- Maintained SOP documentation and issue trend reports to support incident management, escalation handling, and SLA compliance.
- Collaborated cross-functionally in a fully remote environment using async communication tools to ensure timely stakeholder updates.

IT Support & Python Intern

Sep 2024 – Oct 2024

Cisco Virtual Internship

Remote

- Diagnosed and resolved application and script-level issues through structured troubleshooting methodologies, maintaining detailed incident logs.
- Automated repetitive support workflows using Python, reducing manual intervention and improving ticket throughput.
- Coordinated issue tracking and status updates via Microsoft Teams and Outlook, contributing to improved team response efficiency.

Technical Documentation Intern

Dec 2023 – Jan 2024

Salesforce Virtual Internship

Remote

- Authored SOPs and knowledge-base documentation that standardized 10+ support workflows, reducing onboarding time for new team members.
- Performed SQL-based data validation and analysis on large enterprise datasets, identifying data quality issues and recommending fixes.
- Produced structured incident trend reports that surfaced recurring issues, driving process improvement discussions within the team.

Projects

Clash-Free Timetable Generation System | Django, PostgreSQL, Python, Docker | Live Demo

Feb 2026 – May 2026

- Engineered a full-stack scheduling platform serving **50+ concurrent users** with **200+ scheduling slots**, featuring conflict-detection logic that eliminated scheduling errors by ~95%.
 - Designed and optimized PostgreSQL schema for backend performance; handled end-to-end deployment, system testing, and production troubleshooting.
 - Maintained comprehensive project documentation and provided deployment support in a production cloud environment.
- Live URL : <https://timetablemanagementsystem-pmzj.onrender.com>

Anuttaram 3.0 Web Platform | Python, HTML, CSS, JavaScript, Git | Live Demo

Feb 2025 – Apr 2025

- Contributed to development, debugging, and live deployment of a public-facing web platform used by the college community.
 - Resolved production bugs using systematic troubleshooting and Git-based version control, ensuring platform stability and a smooth end-user experience.
- Live URL : <https://anuttaramgecs.github.io/Anuttaram-3.0-Website/>

Education

Government Engineering College, Sheohar – Bihar Engineering University

Aug 2022 – May 2026

B.Tech in Computer Science & Engineering (Data Science)

CGPA: 8.16 / 10.0

Certifications

- Python, C & C++ – Spoken Tutorial, IIT Bombay
- C Programming & Embedded System Design (ESD) – NPTEL
